Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The claims are drawn to multiple sequences. Each of the different sequences are independent and distinct inventions because no common structural or functional properties are shared. Accordingly, these sequences are each subject to restriction under 35 U.S.C. § 121. **Applicant is required to elected a single sequence, which if determined to be patentable, would also be patentably distinct from other sequences.** This requirement is made under 1192 O.G. 68 Notice (November 19, 1996), as examination of more than one sequence in one application would result in an undue burden on the PTO. Failure to elect a specific sequence will be considered to be a non-responsive reply.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17-(h).
